Work Experience

Tiger Advisory Parsippany, NJ

Jun 2025 – Sep 2025

Data & Frontend Analyst Intern

- **Validated and reconciled data** across Supabase backend systems for 1,000+ user records, identifying discrepancies and maintaining data integrity across multiple platforms.
- Designed **operational dashboards** in React.js to monitor user activity and performance metrics, enabling real-time data-driven decisions for the product team.
- **Automated manual reporting workflows** using AI-native tooling, reducing report generation time by 30% and significantly cutting data recording errors.
- Collaborated with product and backend teams to **collect, clean, and structure** user data, supporting weekly performance reviews and stakeholder reporting.

Parthvitech Innovatives LLP Vadodara, India

Sep 2023 – Dec 2023

Data Analyst

- **Analyzed and reconciled** application performance data for a mobile insurance platform serving thousands of users, identifying API bottlenecks that reduced latency by 53%.
- Produced **quality control reports** and monitored operational **KPIs** across a 5-member team, streamlining the delivery cycle by 22% and ensuring all client data requirements were met.
- Conducted **data reconciliation** between application logs and client-facing records, flagging anomalies and collaborating with backend teams to resolve discrepancies within SLA timelines.

Digikentro Vadodara, India

Jul 2022 – Sep 2022

Business & Data Analyst Intern

- **Collected, cleaned, and analyzed** user behavior data from REST API integrations, uncovering retention trends and supporting product decisions across web platforms.
- Performed **root-cause analysis** on critical data and process bugs, resolving 85% of issues and improving release quality and operational data reliability.
- Supported internal reporting by maintaining **structured data logs** and tracking process metrics, contributing to improved team visibility and decision-making.

Projects

Netflix User Ratings Analysis — Clustering & XGBoost

- Cleaned 8,800+ Netflix records (30%+ missing fields); applied **K-means clustering** for user segmentation and built a content recommendation model with **XGBoost**, boosting rating prediction accuracy.

IMDB Movie Ratings Analysis

- Analyzed 5,000+ IMDB records using **Python (Pandas, Matplotlib, Seaborn)** to surface viewer sentiment trends and rating dynamics through interactive visualizations.

Coca-Cola DCF Financial Modeling

- Modeled 5 years of Coca-Cola financials (2019–2023); calculated **WACC** (6.11%) and **IRR** (18.27%) using **DCF** with scenario-based sensitivity analysis to support investment decisions.

Skills

Languages Python, SQL, R, JavaScript, HTML/CSS, C++

Data & Analytics Pandas, Matplotlib, Seaborn, XGBoost, K-means, Excel, Google Sheets

Visualization Tableau, Power BI, React.js Dashboards

Databases & Cloud PostgreSQL, MongoDB, DynamoDB, Supabase, AWS EC2/S3, Firebase

Tools Git, Postman, Figma, Agile/Scrum, Data Validation & Reconciliation

Education

Pace University New York, USA

Expected May 2026

Master of Science in Computer Science **CGPA: 3.8 / 4.0**
